Quality Plant  
Offerings  
for  
1951

From Home Iris Gardens  
St. Paul, Minn.

GREETINGS--to our many iris friends and customers. Thank you again for your many orders and favorable comments. We take pleasure in offering to you our first introductions. Our hardy, northern grown roots are guaranteed true to name, and of first quality. Our iris are not over-fed or over-watered to produce lush growth, nor do we send out undersize rhizomes. We believe that a freshly dug plant will get a much better start in your garden, than one that has been dug several weeks. Therefore, our rule is to dig, trim and wash your rhizomes and ship the following day.

A surplus stock of some varieties, enables us to offer the collection values on pages 17 and 18. Roots will be of the same super-quality.

#### TERMS

Cash with order please. Transportation paid on orders of \$3.00 and over, on smaller orders, please add 25% to defray packing and mailing costs. Please make checks payable to:

R. R. #2                      FARMS HOME IRIS GARDENS  
Saint Paul 6, Minnesota.

We are located two and one-half miles straight east of Highway 61, on the Bailey Road, across the river from South Saint Paul. (One and one-half miles east of the Bailey Nurseries. Visitors cordially welcomed.

Extra iris included in all orders, please state your color choice. We do not substitute unless we have your permission, money will be refunded in this instance. Please order early to avoid disappointment. Orders filled in order recieved, usually starting the 20th of July depending on the season.

OUR GARDEN IS INSPECTED ANNUALLY BY THE  
STATE OF MINNESOTA, NURSERY DIVISION

FARM HOME IRIS GARDENS  
INTRODUCTIONS  
FOR 1951

KAPOSIA--(E.Anderson) 35" VL-----  
(Amitola x (Prairie Sunset x Token))

A lovely warm blend of bright orange and henna-brown with a bronze-orange beard. The full-formed flowers are of exceptionally heavy substance and do not spot or fade in sun or rain. A self, with domed standards and flaring falls, it is very late blooming and a worthwhile addition to this class. Many buds, on a sturdy stalk, it blooms over a long period.  
Named for a Memorial Site--The Village of Kaposia, an Indian Village of the Sioux Indians.....\$10.00

ORGANDY RUFFLES--(E.Anderson) 36" Midseason-----  
(Gloriole x Gudrun)

This very pure white self reminds one of a crisp ruffled organdy frock. The standards are closely domed and beautifully ruffled, the semi-flaring falls are ruffled, with a lightly crimped and serrated edge. It withstands rain in an exceptional manner, and is one flower that does not fold in it's top in the slightest shower. The beard is pale yellow. Stalk is tall and sturdy with moderate branching. Very hardy and a fast increaser.....\$ 5.00

BRONZED GOLD--(E. Anderson) 37" Late-midseason----  
(Treasure Island x Amitola)

A large flower of good substance in a very bright deep gold shade, with a predominant bright orange beard. The entire flower is so heavily ruffled, that the flaring falls have a swirled effect. On close inspection, the falls have a suggestion of an over-lay of light bronze, which in no way dulls it's brilliance. Plant habits are excellent. The stalk is tall and strong and though it has the fault of being slightly bunched, we feel the other qualities make it most worthwhile.....\$ 5.00

RADIANT GOLD--(E.Anderson) 34" Early-----  
(Golden Hind x Radiant)

A pure golden yellow with absolutely no venation to mar it's purity of coloring. This iris is even a brighter gold, than it's pod parent: Golden Hind. Perfectly rounded blooms, of good substance on a well branched stalk of medium height. Early blooming, but the many flowers bring it into the mid-season period.....\$ 3.00

TINTED FRILLS--(E.Anderson) 34" Midseason  
(Ballet Girl x Eros)

Lovely and refreshing, is this delicate pink and white plicata. Both standards and falls are banded with a delicate shade of pure pink. The standards are lightly dotted pink, the falls have a definite white area in the center. The nicely rounded blooms are of moderate size, very ruffled and flaring. A dainty flower, reminding one of pale pink sweet peas.....\$ 2.00

APPLIQUE--(E.Anderson) 35" Midseason-----  
(Wasatch x Tiffany)

A clear white plicata with bright rose markings. Standards are lightly washed rose, the falls have a definite band of the same color. Blooms are lightly ruffled, of good substance, on strong stalks. Very fast of increase and hardy, thus we have sufficient stock, to introduce at a low price..\$ 1.00

PAUL BUNYAN--(E.Anderson) 36" Midseason-----  
(Gloriole x Gudrun)

A very large warm white on a tall, sturdy, well branched stalk. The blooms are of good substance with roundly domed standards and semi-flaring falls. A larger "Gudrun" on a taller stalk, it lacks the gold dusting of that popular variety. Excellent plant habits and very prolific. Should be popular with those who like the big ones...\$ 1.00

Complete Cultural instructions included in all orders.

ALASTOR--36"(Spender)..Brilliant cyclamen pink,  
 chestnut brown hafts, orange beard.....\$.60
